

la mia luce

Amo definire **la mia luce**
semplice, polverosa, imperfetta,
anche se penso sia quasi impossibile dare una definizione alla luce

la Luce è un concetto, una filosofia di intendere il mondo che è attorno a noi

dico sempre che posizionare una lampadina in un certo modo, all'interno di uno spazio,
fa cambiare la visione di quello spazio indipendentemente dal design del prodotto,
quindi è sempre quello che trasmetti, il tuo intendere la Luce e la sua installazione,
che rende differente una persona che Ama la Luce da una persona che usa la Luce.

+renzo

*I love to imagine that **my Light**
is simple, dusty, imperfect,
but I think it's almost impossible to give a definition of Light
Light is a concept, a philosophy of understanding the world around us
I always say that place a lamp in a space does change the vision of that space,
regardless of product design. I think it's what we transmit that creates the differences
between those who love the Light and who uses Light.*

+renzo

"Fatto a mano"

per noi non significa solo avere la possibilità di creare un prodotto in varie forme e misure, significa creare un prodotto ogni volta diverso e sempre unico. Capita che un tubolare di ferro, al momento del taglio, non rimanga perfetto. Capita che una lastra sia più macchiata di un'altra e che durante la lavorazione nascano righe e linee insolite. Queste imperfezioni sono sinonimo di artigianalità, queste imperfezioni rendono unico ogni nostro prodotto.

Unici, imperfetti e irripetibili.

"Handmade"

does not mean creating a product with different shapes and sizes. It means creating a product that is different and unique every single time.

It might occur that an iron pipe does not remain perfect after cutting. It might occur that one metal sheet can be more stained than another.

Unusual lines can arise during the process.

All these flaws are synonymous of "craftsmanship" And they make each product unique.

Unique, flawed and unrepeatable.
